**Slouching Good for Some  
Folks, Doctors Declare**

Kansas City.—"Chin up, shoulders  
back, chest out—"

But the military bearing is not  
the best for every one, Drs. Louis  
B. Laplace and Jesse T. Nicholson  
of Philadelphia told the American  
Medical association at its recent  
convention here.

"Every person has a certain pos-  
ture, determined by his particular  
build and function, which is best  
suited to him," they said.

"Slouching" is good for some peo-  
ple, or, in the words of the doc-  
tors, "there are many persons  
whose optimum physiological func-  
tion is attained in a posture which is  
not entirely correct by orthopedic  
standards."

In such persons, they believe,  
"the greater spinal curve" compen-  
sates for individual differences in  
body structure and physical activ-  
ity.

Studies of twenty-three healthy  
men and women, they reported,  
showed that "vital capacity"—the  
functioning of the heart and blood  
system—can be diminished "by ex-  
treme correction of posture as well  
as by a marked slump."

They found two persons, however,  
whose blood circulation improved  
with corrected posture. "Flexibility  
of posture" results in the best vital  
capacity and each case requires in-  
dividual study, they concluded.

**New and Simpler High  
Power Air Fuel Produced**

New York.—A new fuel for avia-  
tion engines was described by W. S.  
Farish, chairman of the board of  
the Standard Oil company of New  
Jersey, and F. A. Howard, presi-  
dent of the Standard Oil Develop-  
ment company.

The fuel is a synthetic one com-  
posed of gasoline, isopropyl-ether,  
itself a product of a gas now pro-  
duced in large quantities in most  
large oil refineries—and a small  
quantity of tetraethyl lead. It is  
still called by its laboratory "incu-  
bator" name, "EL-435."

The discovery of the blend using  
so common a by-product as isopropyl  
ether, Mr. Howard explained,  
assured the aviation industry of be-  
ing able to obtain in ample quan-  
tity and at commercially practical  
prices fuel of 100 octane rating  
which had heretofore been made in  
a different way and confined to mili-  
tary use.

Tests indicate that the new fuel  
will give an increase of 30 per cent  
in power.
