MISS MINNIE A. WILCOX, Teacher in the Intermediate Department.

MISS HELEN M. COLVIN, Teacher in the Primary Department.

MISS M. MABEL GRAFTON,
Teacher of Music.
Instruction in Instrumental Music at reasonable rates.

Advantages of the Morris High School.

HE MORRIS HIGH SCHOOL building, so lately erected and equipped at a cost of over \$8,000.00, is pleasantly located just far enough from the business portion of the town to escape the noise, yet near enough for all convenience. The sanitary conditions of the building and grounds are carefully looked after, and in point of excellence are not equalled by any school in this part of the State, as is well known by all who understand the most modern systems of heating, ventilating, and dry closets.

The village of Morris, which is beautifully situated in the fertile valley of the Butternut creek, has been for many years an educational center, in both elementary and higher instruction, and to-day its school stands second to no similar institution in the land as regards

the advantages offered students.

Unlike most villages of its size, Morris is provided with an excellent system of water works, and has this spring put in a new gas plant for lighting purposes. In fact, Morris is noted for the alacrity of its business men; the pure and bracing air, conducive to health and vigor; the broad and well-kept streets; the abundance of beautiful shade trees; and the fine lawns and pleasant homes which are so justly the pride of its citizens, and make the village a desirable place of residence throughout the year. There are five churches in the village and to their services and to the young people's societies connected with them students are heartily welcomed.

The school authorities take broad and sensible view of education, and endeavor to furnish the best possible facilities for obtaining a thoroughly practical knowledge which will not only prepare students to enter our higher institutions of learning, but will also secure for them such education as will be of assistance in obtaining an honest

livelihood

The excellence of the faculty is shown by the fact that without exception it is composed of teachers of ability acquired by successful experience. They are ever ready to counsel and assist those under their care in the formation of such ideals of life and such habits of self-control, thought, and action, as will develop a noble manhood or womanhood, and produce excellent citizens.

Parents desiring to give their children an education, will do well to

send them to the Morris school.

The attention of those persons who are desirous of becoming successful teachers is called the announcement in the following pages of the Teachers' Training Class, which has been a prominent feature in this school for twenty years. Other things being equal, the holder of a training class certificate is preferred as a teacher in any school in the State, and has a privileged entrance into the State normal schools.

CORNER OF LIBRARY OCCUPIED BY THE TRAINING CLASS.

Teachers' Training Class.

Morris High School is under appointment to instruct a Teachers' Training Class. A years' course in this class, successfully passing the examinations, secures to the pupil a Professional Certificate, issued by the State Department, which is good for three years of teaching, and is renewable at the end of that time without examination, thus exempting the holder from the uniform examinations year after year. In addition to this, the holder of a Professional Certificate, desiring to enter any of the Normal schools of the State, is exempt from one year's work in such school.

The thoroughness of the instruction given the Morris High School Training Class is seen in the fact that not a member has failed to pass the required examinations since the Professional Certificate has been issued (with the exception of two students, and they will secure the Certificate at the next uniform examinations, having missed in one

subject each at the June examinations).

It was remarked this year by one of the examiners in the Department of Public Instruction, after reviewing the June examinations of this class, "It is the best of any of the fifty thus far examined, and undoubtedly the Morris class has the best standing of any of the classes in the State."

The importance of securing the Training Class Certificate was never greater than at present, since under the uniform system of teachers' examinations, beginning January 1, 1899, only four examinations are to be held in each commissioner district during the year, in which candidates must obtain at least 75 per cent. in each subject in order to pass, and at least 90 per cent. in order to exempt them in any subject from examination to examination.

The Morris High School has been designated as an institution to instruct a training class during the school year of 1898 and '99, because of its former success, and the fact that it can comply with the following conditions of appointments: (a.) The class shall be instructed for not less, each day, than three recitation hours of forty-five minutes each. (b.) The instructor shall be a Normal or College graduate, or one holding a State certificate granted since 1875. (c.) The class shall be seated in a department by itself. (d.) The class shall have opportunity to observe methods of teaching. (e) The recitations of the class shall be conducted separately from the other recitations of the school. (f.) The class shall be maintained eighteen weeks each term.

Qualifications for

I. Candidates must be at least seventeen years of age at the time of entrance.

Admission.

2. Before admission, they must hold as a minimum qualification either an unexpired third grade Teachers' certificate and have attained a standing of sixty per cent in Civil Government under the uniform examinations, or must hold under the Regents a Preliminary Certificate and fourteen academic counts, four of which shall be in English, two in American History, two in Civil Government, two in Physiology, and the other four optional,

Teachers' certificates expiring July 31st, inst., will admit candidates

to the training class in the following September.

3. Candidates must declare that they intend to teach.

Examinations. Special examinations in all subjects required for second grade certificates, and in the additional professional subjects prescribed for training classes, will be held in January and June.

Tuition Free. No tuition is charged to members of the Training Class, even though the Principal allows them to take academic work in completing a course in the High School, therefore it is possible to graduate from the school and at the same time to complete the work for a professional certificate at little or no expense.

Positions. School Commissioners are in duty bound to show a preference to teachers who have taken a course in the Training Class, and to assist them in securing good positions.

Organization.

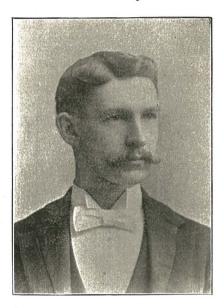

1. The class must consist of not less than ten nor more than twenty-five members. The first to make application, with the proper credentials, will be admitted. Those desiring to enter, should make application at an early date as possible to Principal Frank Stanbro, Morris, N. Y., or to the Secretary of the Board of Education.

2. The class will be organized on Monday, September 12th.

Personal Reference to Members of the Faculty.

PRINCIPAL FRANK STANBRO.

Mr. Frank Stanbro, a graduate of the Albany Normal College, class of '93, and a successful teacher since graduation, has been engaged as Principal of the school for the year beginning Sept. 1st next. Mr. Stanbro comes to Morris highly recommended by all with whom he has been associated in his work. He is experienced in Regents' work, and thoroughly prepared for his part of the work in conducting the Training Class. He is also an alumnus of the Brookfield High School, graduating in '89; holder of a first grade certificate, and a teacher of considerable repute before entering the Normal College. Mr. Stanbro solicits the co-operation of parents in his work, so that, working together, they may be as a unit in leading young minds to form high ideals whereby their lives may be fashioned, and the most good secured as a result of their school life.

Miss Grace E. Moulter of Manlius, N. Y., who has shown her efficiency as Preceptress and instructor of the Training Class for the past year, is retained with the approbation of all concerned. Her classes have made wonderful records. Miss Moulter received her education at the Manlius Academy, the Elmira Female College, and the Oneonta Normal School, graduating from the latter institution in the class

of '97; and, in addition, has had several years' experience as a teacher. She is an admirable instructor and adds much strength to the school.

The Misses Bresee, Wilcox, Colvin, and Grafton, teachers in the grades and music, are all alumnæ of the Morris High School, who have distinguished themselves as zealous, painstaking, competent teachers at their alma mater. Miss Bresee is retained for the eleventh year, Miss Wilcox for the ninth, Miss Colvin for the fourth year, and Miss Grafton as teacher of music for the eleventh year. No higher compliment, or guarantee of their ability as instructors and co-workers, can be given than to state that they are thus retained by the Board of Education.

Tuition for Non-Residents.

Per term of ten weeks to pupils not members of the Training Class.

Academic Department, for two or more advanced subjects,

Academic Department, preliminary subjects and one advanced,

Academic Department, post-graduates,

Grammar Department,

Intermediate Department,

Primary Department,

Tuition must be paid at the middle of each term, or before.

No tuition for less than a half term is received.

Board can be had in private families in Morris for \$1.50 to \$2.50 per week. Rooms, furnished or unfurnished, without board, for 50c to 75c per week.

For Catalogues and further particulars or for any information desired concerning the school, not found in the Catalogue, address Principal Frank Stanbro, or E. E. Carpenter, Secretary of the Board of Education, Morris, N. Y.

THE ACADEMIC ROOM.

General Observations.

Pupils are expected to remain during school hours in the school building, spending the time not devoted to recitations in preparing lessons in the study room. To maintain a fair standing, academic pupils will find it necessary to study at home, as a general rule, not less than two or three hours daily, and others a less amount as they are remote from the academic department.

Three studies should be taken each term, and no more or less, except by special permission. All students who wish to attain success in their work must resist all temptations to permit social pleasures to interfere with the proper hours for study.

Regular and punctual attendance at school is of the utmost importance; indeed, they are the essential conditions of thorough training and success. Absence from a single recitation spent in the explanation of some fundamental principle may occasion a loss that will never be wholly overcome.

The Principal shall have general supervision of the school, both in instruction and discipline. He shall formulate a systematic course of study, and examinations therein, for each department, subject to the approval of the School Board. He shall have power to require proper excuses for absence or tardiness, and to suspend any pupil for misconduct for a period of two school days, but shall report every suspension to the President or Secretary of the Board of Education. Suspension for a longer period shall be by vote of the Board.

Teachers shall be in their respective departments at least twenty minutes before the hour of school opening, and shall see that good order is maintained in all parts of the school building and grounds.

Pupils shall be required to be punctual and regular in attendance, industrious in work, and well-behaved in conduct.

Graduation.—The Regents' preliminary certificate and forty-eight additional counts are required for graduation, eight of which must be in English, and six at least in each of Mathematics, Science and History, and Social Science. [See page 18.]

Library and Apparatus.—The school possesses a collection of books, comprising standard works of biography, travel, history, literature, science, and fiction, which together with the latest dictionaries and encyclopædias makes it one of the finest of reference libraries, to which choice selections are constantly being added. The Laboratory consists of a considerable amount of valuable physical and chemical apparatus, rocks and minerals, stuffed birds and animals, maps, charts, globes, and appliances for teaching astronomy, natural history, physiology, geography, and mathematics.

Compulsory Education.

First, The Compulsory Education Law is obligatory upon, and its enforcement required by, the school authorities of every city, union free school district, common school district and school districts created by special law, within this State.

Second, All children between eight and sixteen years of age in proper physical and mental condition are required to attend upon in-

struction, as in said law specifically stated, namely:

(1) All children between eight and twelve years of age must attend during the entire period public schools are in session between the first of October and the first of June following.

(2) All children between twelve and fourteen years of age must attend at least eighty consecutive days during the same period, and

the whole period unless lawfully employed.

(3) All children between fourteen and sixteen years of age must attend when not lawfully employed.

Third, The teachers in such schools are required to keep a record of attendance of such children, as in said law specifically stated.

Fourth, All persons in parental relation to such children are required to cause such children to attend school, as in said law specifically stated, and any violations of the provisions of said law in that regard is a misdemeanor punishable by fine, or fine and imprisonment, as in said law specifically stated.

Fifth, Any person, firm or corporation employing any child or children contrary to the provisions of said law is liable to the payment

of penalties as in said law specifically stated.

By direction of the State Inspector the Compulsory Education

MORRIS HIGH SCHOOL.

Law must be lived up to. Parents neglecting to keep their children in school must be fined, not to exceed \$5 for the first offense and \$50 for the second. One-half of the public money may be withheld rrom any district where the authorities neglect to enforce the law. Anything more than two unexcused absences during any month constitutes irregular attendance. Three times tardy counts the same as one absence.

University Credentials.

- 1. Preliminary Certificate (Preacademic). Reading, Writing, Spelling, Elementary English, Arithmetic, Geography.
- 2. First Year Certificate. All preliminaries and 12 counts. No certificate is issued for 12 counts unless it includes first year English (or Advanced English and English Composition), U. S. History and Drawing, and either 4 counts in mathematics, or Physiology and Hygiene, and 2 optional counts.
- 3. Academic Certificate. All preliminaries and any 24, 36, 48, 60, etc., counts, if one-sixth of the first 24, 36 and 48 counts are in English.
- **4.** Academic Diplomas. All preliminaries and any 48 counts, if not less than eight are in English, and not less than six from each of the second, third and fourth groups. (For groups see opp. page).
- 5. Advanced Diploma. The single diploma provides for all academic courses longer than the regular 48-count course covered by the academic diploma, and 12, 24 or 36, etc., counts in addition.
