Samuel J. On the 30th of paper which embodying such correct views September, 1874, Hoxie agreed to assign on the political situation in the State, expressed so forcibly and well, that the paper was published as a campaign document, and it was at first believed to be the work of Van Buren. It attracted the attention of men of all parties. Two years after of men of all parties. Two years after this young Tilden entered Yale College. After graduating he began the practice of law in New York. In 1846 he was elected Member of Assembly. From then until now his influence has been felt in shaping the history of the State. His industry is unflagging, his honesty is proverbial, and his every effort is toward reform. He is the rec. ognized champion of the people against corrupt organizations, and grasping corporations.
